

CS2212B W25 Team Peer Review Assessment

This document contains an anonymized summary of the peer review assessment of you by your fellow team members. Included are a combined normalized scores given to you by your teammates and any public feedback they wish to share. It also contains your mark for reviewing your team which is part of your Project Postmortem grade.

Student: Jack Ivan Fedash
Username: jfedash
Team #: 71

Peer Review of You by Your Team (10% of final grade)	
Review Item	Combined Normalized Score from all Team Members
Requirements Documentation:	100.00%
Design Documentation:	100.00%
Implementation and Testing:	100.00%
Delivery:	100.00%
Project Management:	100.00%
Overall Contributions:	100.00%
Total Grade:	100.00%

Your Review of Your Team (This is part of your Project Postmortem grade)	
Review Item	Your Score
Gave all members a score (/10):	10
Gave detailed feedback (/10):	10
Submitted an Excel file (/5):	5
Followed instructions (/5):	5
Late Penalty:	0
Total Grade (Out of 30)	30

Feedback From your Team

Jack approached the project with a high level of professionalism and commitment. He consistently produced high-quality work, staying on top of his tasks and meeting every deadline. He maintained excellent communication, ensuring that everyone was up-to-date and informed at every stage of the process. Jack also contributed valuable insights during planning and problem-solving, which helped guide the team in the right direction. His collaborative spirit and dependability made him an outstanding member of our group.

Jack demonstrated strong versatility and contributed meaningfully in every phase of the project. His technical proficiency, especially in coding, significantly accelerated our progress and allowed the team to focus on refining our deliverables. He showed leadership through his proactive support, ensuring all team members were aligned and confident in their tasks. Jack was not only technically skilled but also highly dependable, making him a pleasure to work with throughout the project.

I felt that the project went well overall, and I am proud to be a key contributor. Throughout the project, I played a leadership role in team meetings, encouraging collaboration and ensuring we stayed on track with our objectives. I dedicated time to research NetBeans and Java Swing to be an asset during the implementation phase, which enabled me to effectively lead the team in this area. My ability to adapt quickly allowed me to learn Java Swing in a short time, despite having no prior knowledge of it. Furthermore, I took on many additional tasks during the implementation phase, especially when one of our team members was unable to participate. In reflecting on this experience, I recognize the importance of learning to teach others how the program works to enable them to contribute effectively. I sometimes expect team members to self-teach, as I did, but I realize this is not always an effective approach. By focusing on supporting my teammates in their learning process, I can help foster a more collaborative and efficient working environment in future projects.

Crazy coder, really helpful

Great work, spear headed the project.
